Advance List of Imported and Domestic Bulbs

**Tulips! Hyacinths! Crocus!
Daffodils!**

This complete advance bulb list serves a two-fold purpose this year. Those who will order early from this list will avoid disappointments that will result from late ordering. An additional advantage is that these prices truly represent a lower priced offering than will appear in our general fall catalog which will be issued in September.

62-61 AMERICAN, DUTCH, FRENCH and ENGLISH GROWN BULBS

Yes, they will be back again this year, these first symbols of our victory in Europe. Their entry will be most welcome and timely, for our American-grown bulb stock of Tulips has been so heavily drawn upon during the war years that we have less than half of our season's requirements available.

The supply of imported bulbs will be quite limited. Much acreage had been devoted to food production, and the remaining acreage has had to produce bulbs for export and huge planting stocks. It will be wise to place your order without delay as we frankly believe that we will be sold out by November 1st.

Not all Dutch-grown bulbs are necessarily perfect because they are imported from the Netherlands. These bulbs are also graded and selected for different qualities, among which there are many poor grades. We handle top quality imported bulbs only, that have been grown and collected for us by the finest specialists in Holland. Remember, that the name of Max Schling has been synonymous with bulb quality for more than a quarter century.
